

SYLVAIN BEAUCHAMP

1984: Diploma in Industrial Food Engineering (GIA) at the Agri-Food Technology Institute of St-Hyacinthe (ITA)

1984 – 1985: Quality control director *7up* in Sherbrooke

1985 – 1986: Quality control director *Parmalat* in Marieville

Chemistry at
the service of
the community
since 1984

1986 – 1988: Technical manager at *Lassonde et fils* in Rougemont. It was during this period that Sylvain participated in the implementation of the very first aseptic bottling line in a clean room in Canada using peracetic acid (APA). APA is one of the most effective and recommended disinfectants worldwide.

1988 – 1990: Technical representative for Eastern Canada at *Henkel Chemicals*

1990 – 1996: Vice-president of Agro-Industrial Division of *Constant Laboratoires*

1996 – today: Foundation of the *OmniChem* company. The undeniable experience, skills and expertise that Sylvain has acquired in his field over the years have enabled him to create a manufacturing and distribution company of industrial chemicals as well as the technical services relevant to their safe use by respecting the strict rules of *Santé Canada*. The Canadian International Development Agency (CIDA) enabled him to finalize the project to install a factory for manufacturing cleaning and disinfection chemicals in Algeria SARL *OmniChem*.

1997: *OmniChem* begins exporting its products to Haiti. This collaboration for the cleaning and disinfection of agro-industrial factories has never been interrupted despite the 2010 earthquake, hurricanes or civil instability. Our team travels regularly for advice and technical support.

2008 – 2011: *Danone International Consultant*. Sylvain's role was to collaborate with the Paris headquarters team to develop their systems and improve their washing and disinfection processes. Sylvain has been mandated by the *Danone* group to physically audit factories in France, Germany, Hungary, the Czech Republic, Romania, Bulgaria, Poland, Russia, Turkey, Saudi Arabia and Brazil.

2020: Acquisition of the company *ChapteC*, specialist in chemicals for the hospital sector. The fusion of the skills of *OmniChem* services as well as those of *ChapteC* create a synergy between the agro-industrial world and the world of the hospital sector
