

PRO-700
COMPLETE ELECTRIC RUST PROOFING SYSTEM WITH ACCESSORIES

- 1) Cut PVC tube to length desired or order:

PRO-700D-3 = 20 liters – 5 gallons
 PRO-700D-4 = 55 liters – 15 gallons
 PRO-700D-5 = 205 liters – 55 gallons

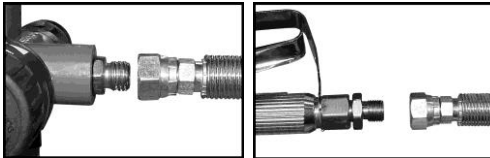

- 2) Insert PVC tube and clear tube into the product pail.

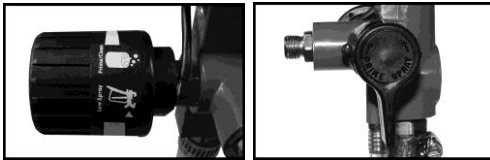

- 3) Put the little clear hose inside the bucket.

- 4) Attach blue hose onto the Pro-700 and the rust proofing gun as shown. Do not over tighten.

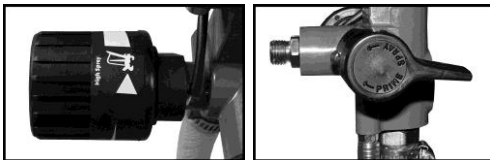

- 5) Turn the black handle on the Pro-700 to position #2.

- 6) Start the Pro-700 and run 2 - 3 minutes to prime the pump. The pump will be primed when the clear hose is filled with product.

- 7) Turn the black handle on the Pro-700 to position #1 for spraying.

- 8) Attach desired Pro-700D-6 high pressure hose or Pro-700D-2 nozzle adaptor for large spray pattern

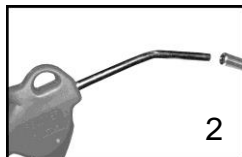

PRO-700D-6

PRO-700D-2

Trouble Shooting

* If the Pro-700D-6 high pressure hose nozzle is blocked, unscrew the complete nozzle as shown in picture 1. Take a blow gun and insert into opposite end of nozzle as shown in picture 2. Apply pressure until the nozzle is no longer blocked.
